

Protect your car inside and out

Unlike waxes, advanced polymer sealants and fabric protectors, the Toyota ProTect package can be used on interior fabrics, alloy wheels and side windows as well as the exterior paintwork.

Exterior

Seal your vehicle with a tough glass-like shell that protects paintwork and side windows from pollution, weather and other external threats.

Interior

Protect interior fabrics from everyday dirt and grime. Simply wipe away all kinds of substances without staining.

Alloy Wheels

Give valuable alloy wheels outstanding protection against brake dust, road grime and weather.

How should I clean my car?

There's no need to use polish, wax or any product other than a mild shampoo or vehicle wash concentrate when you wash your car.

Will Toyota ProTect need to be reapplied?

No. It is guaranteed to protect your vehicle for five years.

Can I jet wash my car?

Yes. The Toyota ProTect will not be affected.

Can I use a car wash?

A well-maintained car wash on the cheapest cycle will not remove Toyota ProTect.

Can the car be hand washed?

Yes. Toyota ProTect resists detergents very effectively.

Which shampoo should I use on the car?

Any good quality car shampoo is suitable for cleaning vehicles which have been treated with ProTect, as long it it **does not** contain wax.

Can Toyota ProTect be applied to used cars?

Yes. It can be professionally applied to new or used vehicles.

What if my vehicle is involved in an accident?

Your Toyota Authorised Repairer can reinstate ProTect on all relevant vehicle parts as part of your insurance claim.

TOYOTA

Toyota ProTect

A showroom finish that lasts and lasts

5 year
GUARANTEE

Genuine Parts

Discover Toyota ProTect

There's nothing like the showroom gleam of a brand new car. However, maintaining that pristine look has always been difficult, if not impossible. Until now.

Toyota ProTect is a revolutionary new NASA-derived coating which provides high-grade protection for vehicle surfaces, and is now available from your Toyota Authorised Repairer/Retailer.

Just one application gives your vehicle five full years of protection.

The revolutionary solution

Toyota ProTect is not a traditional wax or even an advanced polymer sealant. It is new technology that forms a molecular bond with your car's paintwork, creating an extremely tough, durable seal.

- Forms a ceramic-hardened finish that bonds with the paintwork.
- Protects against traffic film, pollution, acid rain, solvents and the initial damaging effects of bird lime. Due to the hazardous nature of bird lime, it must be removed within 48 hours. This event is not covered under the terms of this guarantee.
- Hydro-repellent to keep your vehicle looking showroom fresh for longer.
- No monthly conservers required to maintain your guarantee
- The perfect way to revitalise the appearance of older vehicles.
- Lasts many times longer than advanced polymer sealants.
- Paintwork protection guaranteed for five years from date of application.
- Products to treat alloy wheels and interior fabrics as well.

Cleaning made easy

Once your vehicle is sealed by Toyota ProTect, it's simple to keep it clean.

- Just wash as normal with a regular car shampoo
- No need to wax within the five year guarantee period
- Save time, save money, save water

Maintain your vehicle's value

A shiny showroom finish isn't just about looking good. It's also about maintaining the value of your car.

Condition

Toyota ProTect helps keep your car in the best possible condition, ensuring an enhanced part-exchange value or selling price when you decide to change your vehicle.

Transferable guarantee

Not only do you benefit from the product's five year guarantee, but the next owner will too, within the five year period.

More attractive to buyers

Just like you, potential buyers want peace of mind when they're looking for a car. Toyota ProTect reassures them that your vehicle is a sound investment – which is good for them, and good for you.
